PROFILES

PROFESSIONAL SUMMARY

A software developer with strong experience building scalable, user-focused web applications using React.js, Node.js, JavaScript, and modern full stack technologies. Proven ability to develop full-featured SaaS products, optimize performance, and deliver responsive, production ready applications. Passionate about building real world solutions, including CRM systems, automation tools, and data driven platforms.

PROJECTS

EstateFlow AI – Estate Management CRM:

- Designed and developed a full-featured estate management SaaS platform for managing residents, payments, visitors, complaints, and facility bookings.
- Developed responsive frontend interfaces using React.js, Tailwind CSS, and Vite.
- Built backend APIs with Node.js and Express.js, integrating Supabase/PostgreSQL for data management.
- Implemented JWT authentication and role-based access control for Admin, Resident, Security, and Maintenance users.
- Integrated payment workflows, visitor management, and AI-assisted complaint routing features.
- Optimized application performance, scalability, and deployment for production environments using Vercel and Render.

OMK Unwind Spa – Spa & Wellness Website:

- Designed and developed a full-stack spa and wellness platform focused on improving online visibility, customer engagement, and appointment booking management.
- Built responsive frontend interfaces using React.js, Tailwind CSS, and Vite, ensuring seamless user experience across desktop and mobile devices.
- Developed backend APIs using Node.js and Express.js to manage bookings, customer inquiries, promotions, and service data.
- Integrated database management for storing appointments, customer information, and spa service records.
- Implemented appointment booking workflows, contact forms, and admin management features to streamline operations and customer communication.
- Optimized website performance, responsiveness, and SEO to improve discoverability, scalability, and user experience.
- Designed modern UI/UX layouts tailored to the spa and wellness industry, improving brand presentation and customer conversion..

Authie - Secure Authentication Platform:

- A Developed an intuitive and user-friendly authentication interface for seamless user management.
- Built a responsive and dynamic authentication system using React.js, ensuring smooth interactions across all devices.
- Implemented email confirmation for identity verification, enhancing security and trust.
- Designed and integrated an account management feature for users to update personal details and credentials easily.
- Developed a profile picture upload functionality for enhanced user personalization.
- Ensured secure authentication using JWT, following industry best practices for data protection.
- Optimized performance to provide fast, efficient, and secure authentication processes.
- Maintained cross-browser compatibility and adherence to accessibility standards for inclusive user experience.

Task Master - Productivity & Task Management App:

- Designed and developed a clean, user-friendly interface for seamless task management.
- Built a dynamic and responsive web app using React.js, ensuring smooth usability across devices.
- Implemented task creation and deletion functionalities to enhance productivity.
- Integrated a search and filtering system to help users quickly find specific tasks.
- Ensured smooth state management for real-time task updates and interactions.
- Optimized app performance for fast load times and an efficient user experience.
- Maintained cross-browser compatibility and adhered to accessibility standards for broader user accessibility.

Stream Movie Website:

- Developed a user-friendly and visually appealing interface for movie enthusiasts
- Created a stunning Dynamic and Responsive Movie Website using React js for seamless browsing across devices.
- Designed interactive features such as a search function, movie genre and movie sliders to enhance user engagement.
- Optimized performance to ensure fast loading times and smooth user experience.
- Ensured cross-browser compatibility and adherence to accessibility standards for wider accessibility.

Portfolio Website:

- Developed a responsive portfolio website using HTML, CSS, and JavaScript to showcase personal projects and skills.
- Implemented smooth animations, interactive elements, and a mobile-friendly layout for optimal user experience.
- Integrated multiple means of contact and communication.

E-commerce website:

- Developed the user interface using HTML, CSS, and JavaScript. Made timely follow-up calls on initial contacts, to provide feedback and progress on issues raised.
- Created a visually appealing and responsive design for seamless browsing across devices.
- Designed interactive features like image galleries and product sliders to enhance user engagement.
- Optimized performance to ensure fast loading times and smooth user experience.
- Ensured cross-browser compatibility and adherence to accessibility standards for wider accessibility.
- Integrated a streamlined add to cart and checkout process.
